Alternatives to Chromium for Metal Finishing

Final Report of NCMS Project No. 17-0403

National Center for
Manufacturing Sciences

3025 Boardwalk
Ann Arbor, MI 48108-3266
734-995-0300

A detailed summary of testing on 29 chromium-free alternatives for conversion coating of aluminum alloys. Salt spray, conductivity, and paint adhesion tests were performed on coated samples of five aluminum alloys. Report includes an environmental impact assessment of the alternatives, compared to a standard chromate coating.
